

Training Cycle:
Cycle Duration:
Work Week
Focus:

Phase 14
8 Weeks
2/8
Enhanced Strength, Endurance & Lactate Tolerance

Intensity Note:

- **Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine – burns fat as a primary fuel source)**
- **Red highlights indicate HR Zone 3+ (Builds your strength, speed & LT – burns stored sugar as a primary fuel source)**

Monday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**
- **Complete Rest Day**
Misc. Notes: please pay close attention to your hunger levels throughout the day. When it comes to optimum nutrition, you need to focus on three components: nutrition quality, quantity, and timing. When your daily intake of food is derived from fresh fruits, vegetables and lean protein sources, you have the quality covered. If you are eating every two hours, then your timing is spot on. However, if you are finding that you are getting hungry before your next snack or meal (ideally every two hours), simply increase the density and quantity of food that you are consuming. As you have heard me say, no one has ever increased in body fat by eating fresh fruits, vegetables, and lean protein daily. Ironically, in most of the time that an individual experience an increase in body fat, it is from insufficient calorie intake which results in an increase in blood cortisol levels (because of the “stress” created when the body is constantly hungry). When blood cortisol levels increase, so does your percentage of body fat.
- **Evening Protocols**
Nutrition: consume 8 ounces of [Energy Fuel](#) to top off your electrolytes and hydration levels
Foam Roller & Trigger Point Therapy: soften the muscle and connective tissue with the [foam roller & then apply TP therapy](#)
Diaphragmatic Breathing: [click here](#) to strengthen your diaphragm (your breathing muscle), breath through a straw & nose closed.

Tuesday

- **Body Analysis: please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**
- **(Morning Workout) Complete Racing Solutions MX: Speed Workout #1**
[Please refer to the spreadsheet at the bottom of this document]
Workout Notes: to ensure that you have the desired top end speed for your sprints, keep a close eye on your intensity levels during the aerobic set. Approach your sprint intervals as if it was a real race scenario-100% mentally focused on attacking the track and all of its elements. Keep your rest interval in between your sprint intervals the EXACT same duration as your work time. For example, if your 3-lap sprint interval takes you 6 minutes, rest 6 minutes (no shorter). During your rest interval, consume 6-8 ounces of Energy Fuel to maintain your muscle and blood sugar levels along with your electrolytes for optimum muscle contraction.
Post Workout Protocols
 - **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads, and calves
 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout – Maximum Strength**
[Please use the spreadsheet and associated videos listed at the bottom of this document]
Workout Notes: stay mentally focused on the emphasis of this strength phase: maximum strength. Your rep count will be low and the load levels need to increase from set to set. To avoid injury, implement PERFECT form and control the weight (avoid throwing the weight around this will stress your tendons and ligaments).
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.
Sets: 3
Reps: 6 – 8 (unless otherwise noted)
Speed of Lift: consistently slow through entire range of motion
Rest Interval: none in between exercises; 1:00 in between cycles
Post Workout Protocols
 - **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
 - **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue
- **Evening Protocols**
Nutrition: consume 8 ounces of [Energy Fuel](#) to top off your electrolytes and hydration levels
Foam Roller & Trigger Point Therapy: soften the muscle and connective tissue with the [foam roller & then apply TP therapy](#)
Diaphragmatic Breathing: [click here](#) to strengthen your diaphragm (your breathing muscle), breath through a straw & nose closed.

Wednesday

- **Body Analysis** – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
Complete One of the Following for your Morning workout:
- **Complete Racing Solutions Row: Heart Rate Pacing Blocks (80 Minutes)**
Misc. Notes: for this workout you will need to know you're up to date **HR Z2 numbers** (high and low specific number).
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.
Warm up (HR Z1): Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.
Load Level: 3 Duration: 10 Minutes Pull Rate: less than 25 [Stretch your lower body](#)
Main Set (HR Z2): Heart Rate Pacing Blocks: 65 minutes
Load Level: 7 Duration: 50 Minutes Pull Rate: between 25-35
Cool Down (HR Z1): Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.
Load Level: 2 Distance: 5 Minutes Pull Rate: less than 25 [Stretch from head to toe](#)
- **Complete Racing Solutions Bike: Even Tempo (90 Minutes)**
Misc. Notes: for this workout you will need to know your **HR Z2 numbers** (high and low specific number).
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.
Warm up (HR Zone 1):
Duration: 10 minutes Gearing: small chain ring up front, middle rear gearing
Cadence: 80-85 (no higher/lower) Misc.: stretch and hydrate before moving into your main set
Main Performance Block (HR Zone 2): 1:15
Set Notes: Keep your cadence between 85-95 focusing on optimized pedal mechanics; stand up and stretch your hamstrings, quads, calves and lower back every 15 minutes (at the least). Hydrate to maintain your blood sugar levels every 15 minutes.
Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes
Duration: 5 minutes Gearing: the easiest combination that gets you into HR Z1
Cadence: 85-90 Misc.: don't dismount until your heart rate is within HR Z1
- **(Immediately following your workout) Complete Racing Solutions Chest, Core & Lower Back Work**
Workout notes: complete each of the following exercises for 30 seconds with perfect form; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.
Ab Pike on Fit Ball: [how to video](#) Fit Ball Knee Roll & Push Up: [how to video](#)
Pike & Push Ups on Fit Ball: [how to video](#) Ab Crunch on Fit Ball: [how to video](#)
Post Workout Protocols
 - **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
 - **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue
- **Evening Protocols**
Nutrition: consume 8 ounces of [Energy Fuel](#) to top off your electrolytes and hydration levels
Foam Roller & Trigger Point Therapy: soften the muscle and connective tissue with the [foam roller & then apply TP therapy](#)
Diaphragmatic Breathing: [click here](#) to strengthen your diaphragm (your breathing muscle), breath through a straw & nose closed.

Thursday

- **Body Analysis:** please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX: Speed Workout #2**
[Please refer to the spreadsheet at the bottom of this document]
Workout Notes: this workout will help you address and improve your overall speed by eliminating your biggest limiter on the track. Just like we do with your cross-training efforts, we identify where you are "weak" and implement protocols to eliminate these weaknesses. On the track most racers will not step up and address what they are not good at; however, this is the quickest way to find new speed. Maintain proper blood sugar levels to ensure that your eye hand coordination is optimized.
- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout – Maximum Strength**
[Please use the spreadsheet and associated videos listed at the bottom of this document]
Workout Notes: stay mentally focused on the emphasis of this strength phase: maximum strength. Your rep count will be low and the load levels need to increase from set to set. To avoid injury, implement PERFECT form and control the weight (avoid throwing the weight around this will stress your tendons and ligaments).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Sets: 3

Reps: 6 – 8 (unless otherwise noted)

Speed of Lift: consistently slow through entire range of motion

Rest Interval: none in between exercises; 1:00 in between cycles

Friday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**
- **Complete One of the Following for your Morning workout:**

- **Complete Racing Solutions Row: Heart Rate Pacing Blocks (60 Minutes)**

Misc. Notes: for this workout you will need to know your **HR Z2 numbers** (high and low specific number).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up (HR Z1): Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Load Level: 3 **Duration:** 15 Minutes

Pull Rate: less than 25

[Stretch your lower body](#)

Main Set (HR Z2): Heart Rate Pacing Blocks: 40 minutes

Load Level: 7 **Duration:** 30 Minutes

Pull Rate: between 25-35

Cool Down (HR Z1): Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Load Level: 2 **Distance:** 5 Minutes

Pull Rate: less than 25

Stretch from head to toe

- **Complete Racing Solutions Even Tempo Bike (60 Minutes)**

Misc. Notes: for this workout you will need to know your **HR Z2 numbers** (high and low specific number).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.

Warm up (HR Zone 1):

Duration: 10 minutes

Gearing: small chain ring up front, middle rear gearing

Cadence: 80-85 (no higher/lower)

Misc.: stretch and hydrate before moving into your main set

Main Performance Block: (HR Zone 2) – 45 minutes

Set Notes: Keep your cadence between 85-95 focusing on optimized pedal mechanics; stand up and stretch your hamstrings, quads, calves and lower back every 15 minutes (at the least). Hydrate to maintain your blood sugar levels every 15 minutes.

Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes

Duration: 5 minutes

Gearing: the easiest combination that gets you into **HR Z1**

Cadence: 85-90

Misc.: don't dismount until your heart rate is within **HR Z1**

- **(Immediately following your workout) Chest, Core & Lower Back Work**

Workout notes: complete each of the following exercises for 30 seconds with perfect form; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

Ab Pike on Fit Ball: [how to video](#)

Fit Ball Knee Roll & Push Up: [how to video](#)

Pike & Push Ups on Fit Ball: [how to video](#)

Ab Crunch on Fit Ball: [how to video](#)

Post Workout Protocols

- **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
- **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue

- **Evening Protocols**

Nutrition: consume 8 ounces of [Energy Fuel](#) to top off your electrolytes and hydration levels

Foam Roller & Trigger Point Therapy: soften the muscle and connective tissue with the [foam roller & then apply TP therapy](#)

Diaphragmatic Breathing: [click here](#) to strengthen your diaphragm (your breathing muscle), breath through a straw & nose closed.

Saturday

- **Body Analysis** – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX: Speed Workout (Choice)**
[Please refer to the spreadsheet at the bottom of this document]
Workout Notes: choose from either of this week's speed workouts; if logistically possible, strive to improve on your lap times by 1% - every second counts. When you produce "faster" lap times, answer the question "how did I get faster". If you can explain what you did to create faster speeds, the more ingrained your speed will become.
Post Workout Protocols
 - **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).
- **2 Hour Nap After Mid-Day Meal**
Misc. Notes: to help "encourage" sleepiness, consume some high glycemic item: bowl of cereal, white spaghetti, potato or rice. Make notes as to what you choose to consume, amount and how it affected your stomach; if you had no GI issues, then the item needs to be part of your meal items identified as nap enhancers.
- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout – Maximum Strength**
[Please use the spreadsheet and associated videos listed at the bottom of this document]
Workout Notes: stay mentally focused on the emphasis of this strength phase: maximum strength. Your rep count will be low and the load levels need to increase from set to set. To avoid injury, implement PERFECT form and control the weight (avoid throwing the weight around this will stress your tendons and ligaments).
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction.
Sets: 3
Reps: 6 – 8 (unless otherwise noted)
Post Workout Protocols
 - **Flexibility:** complete [dynamic movements](#), [static stretches](#) & foam rolling exercises for optimum recovery
 - **Nutrition:** immediately consume 8-10 ounces of [Recovery Fuel](#) to replace depleted muscle sugar & repair muscle tissue
- **Evening Protocols**
Nutrition: consume 8 ounces of [Energy Fuel](#) to top off your electrolytes and hydration levels
Foam Roller & Trigger Point Therapy: soften the muscle and connective tissue with the [foam roller & then apply TP therapy](#)
Diaphragmatic Breathing: [click here](#) to strengthen your diaphragm (your breathing muscle), breath through a straw & nose closed.

Sunday

- **Body Analysis** – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX: Aerobic Workout #1**
[Please refer to the spreadsheet at the bottom of this document]
Workout Notes: this workout is long, so the intensity needs to be low (wear your heart rate monitor to help keep you within the optimum zones). By staying aerobic during the entire workout, you are teaching your body to burn body fat as a primary fuel source. This will result in an improved VO2 Max along with a decreased percentage of body fat. If you feel anything tighten up, stop immediately, isolate and stretch the tissue passively until it releases.
Post Workout Protocols
 - **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).
- **2-hour Power Nap/Recovery Protocols**
Misc. Notes: prior to your nap, consume a meal that is high in MCT's (medium chain triglycerides) - extra virgin olive oil, avocados, raw coconut, raw nuts and cold-water fish (salmon). This quality fat will be used to recharge your body from the inside out while satisfying your appetite so that you can sleep soundly for 2-3 hours. When you wake up, consume 8-10 ounces of cold water and 2 scoops of [Energy Fuel](#).
- **Evening Protocols**
Nutrition: consume 8 ounces of [Energy Fuel](#) to top off your electrolytes and hydration levels
Foam Roller & Trigger Point Therapy: soften the muscle and connective tissue with the [foam roller & then apply TP therapy](#)
Diaphragmatic Breathing: [click here](#) to strengthen your diaphragm (your breathing muscle), breath through a straw & nose closed.

Complete Racing Solutions MX Speed Workout #2		Workout Focus: Top End Speed		Total Ride Time: 2 Hours	
	Description				
Warm Up	Set Focus: Gradual Warm Up				Intensity
	Instructional Video on how to set up the Concept 2 Rower Ride either a bike or Concept 2 Rower easy for 10 minutes - even tempo Stretch passively (no bouncing) from head to toe / Rehydrate with Energy Fuel				Less Than 50%
Main Set #1	Set Focus: Hold Consistent Times At An Aerobic Effort				Intensity
Workout Protocol:	Hold your pace for all 10 laps (maximum time 20 minutes) Pay close attention to your heart rate; if you push too hard, you will negatively affect the next set of high-quality pacing intervals. Moto Specific Heart Rate Zone - Low # High #				
Elapsed Times:	Lap 1 Time:	Lap 2 Time:	Lap 3 Time:	Lap 4 Time:	Lap 5 Time:
Elapsed Times:	Lap 6 Time:	Lap 7 Time:	Lap 8 Time:	Lap 9 Time:	Lap 10 Time:
Performance					80-85%
Recap:	Fastest Lap Time: Average Lap Pace: Average Heart Rate: Rest For 20 Minutes - Stretch from head to toe / Rehydrate with Energy Fuel				80-85%
Main Set #2	Set Focus: Opening Lap Speed				Intensity
Workout Protocol:	Prior to beginning this set, ponder what you need to improve on to improve your race results and focus on this component throughout the interval: entry speed, exit speed, scrubbing, etc. Same amount of time it takes to complete the 3-lap interval				
Rest Interval					
Interval Time:	Lap 1 Time:	Lap 2 Time:	Max HR:		90-95%
Interval Time:	Lap 1 Time:	Lap 2 Time:	Max HR:		90-95%
Interval Time:	Lap 1 Time:	Lap 2 Time:	Max HR:		90-95%
Interval Time:	Fastest Lap Time: Average Lap Pace: Average Heart Rate: Rest for an additional 10 Minutes - Stretch from head to toe / Rehydrate with Energy Fuel				
Main Set #3	Set Focus: Skills and Drills				Intensity
Workout Protocol:	Choose a section on the track that you are struggling with during your two lap intervals Dedicate 20 minutes to "fixing" your frustrations in the area of the track where you struggled Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel				N/A
Main Set #4	Set Focus: Opening Lap Speed				Intensity
Workout Protocol:	Take your fastest interval time from the last set and strive to get faster than this lap time				
Rest Interval	Same amount of time it takes to complete the 3-lap interval				
Interval Time:	Lap 1 Time:	Lap 2 Time:	Max HR:		90-95%
Interval Time:	Lap 1 Time:	Lap 2 Time:	Max HR:		90-95%
Interval Time:	Lap 1 Time:	Lap 2 Time:	Max HR:		90-95%
Interval Time:	Fastest Lap Time: Average Lap Pace: Average Heart Rate:				
Main Set #5	Set Focus: Skills and Drills				Intensity
Workout Protocol:	Choose a section on the track that you are struggling with during your two lap intervals Dedicate 20 minutes to "fixing" your frustrations in the area of the track where you struggled Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel				N/A
Warm Down	5 min/easy riding - nothing structured or intense; watch the HR and wait for it to come down				< 40%

Complete Racing Solutions Aerobic MX Workout #1 Workout Focus: Consistent Race Speed Total Ride Time: 2:15		
	Description	
Warm Up	Focus: Gradual Warm Up	Intensity
Workout Protocol:	Instructional Video on how to set up the Concept 2 Rower Ride either a bike or Concept 2 Rower easy for 10 minutes - even tempo Stretch passively (no bouncing) from head to toe / Rehydrate with Energy Fuel	Less Than < 40%
Main Set #1	Set Focus: Consistent Hole shots	Intensity
Workout Protocol:	Complete 10 starts - with a gate (logistic pending) charge into and down the next straight. Change up your gate position so that you can practice the various gate picks you may face Complete your entire routine for each start - muscle memory is imperative here Rest For 10 Minutes - Stretch from head to toe / Rehydrate with Energy Fuel	N/A
Main Set #2	Set Focus: Aerobic Endurance (30 Minute Moto)	Intensity
Workout Protocol:	Complete your interval with a start and then settle into the track at a pace that you can maintain (less than a two second deviation) for 30 minutes Don't take lap times, instead change up your lines every lap: one fast, one non-optimized. Your overall intensity needs to be aerobic - use your HR monitor to evaluate the actual number	75-80%
Performance Recap:	Fastest Time: Average Time: Average Heart Rate: Rest For 10 Minutes - Stretch from head to toe / Rehydrate with Energy Fuel	
Main Set #3	Set Focus: Consistent Hole shots	Intensity
Workout Protocol:	Complete 10 starts - with a gate (logistic pending) charge into and down the next straight. Change up your gate position so that you can practice the various gate picks you may face Complete your entire routine for each start - muscle memory is imperative here Rest For 10 Minutes - Stretch from head to toe / Rehydrate with Energy Fuel	N/A
Main Set #4	Set Focus: Aerobic Endurance (30 Minute Moto)	Intensity
Workout Protocol:	Complete your interval with a start and then settle into the track at a pace that you can maintain (less than a two second deviation) for 30 minutes Don't take lap times, instead change up your lines every lap: one fast, one non-optimized. Your overall intensity needs to be aerobic - use your HR monitor to evaluate the actual number Rest For 10 Minutes - Stretch from head to toe / Rehydrate with Energy Fuel	75-80%
Main Set #5	Set Focus: Aerobic Endurance (30 Minute Moto)	Intensity
Workout Protocol:	Complete your interval with a start and then settle into the track at a pace that you can maintain (less than a two second deviation) for 30 minutes Don't take lap times, instead change up your lines every lap: one fast, one non-optimized. Your overall intensity needs to be aerobic - use your HR monitor to evaluate the actual number Rest For 10 Minutes - Stretch from head to toe / Rehydrate with Energy Fuel	75-80%
Warm Down	10 Minutes of easy riding - nothing structured or intense (watch the HR monitor to ensure)	< 40%
