

Training Cycle:
Cycle Duration:
Work Week
Focus:

Phase 5
6 Weeks
3/6
Race Specific Speed, Strength and Endurance

Intensity Note:

- **Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine – burns fat as a primary fuel source)**
- **Red highlights indicate HR Zone 3+ (Builds your strength, speed & LT – burns stored sugar as a primary fuel source)**

Monday

- **Body Analysis:** please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- **Complete Rest Day**
Misc. Notes: pay close attention to your quality carb (raw/fresh fruits and vegetables) throughout the day. Your intake of quality carbs will ensure that your stored liver sugar (which feeds your brain) and muscle sugar (which fuels your movement) levels are topped off for optimum energy which results in better training quality and the elevation of your strength, endurance and speed. Strive to consume fruits and vegetables at every snack and main meal; in addition to topping off your stored sugar levels, it will also provide your body the necessary vitamins and minerals necessary to support your immune system (and minimizing your down time).
- **Evening Mental Protocols:** watch this video in a place where you have zero distractions for 5 minutes (the length of the video)
Psychology: concept video "**Difference between Anabolic or Catabolic**" – [video link](#)

Tuesday

Body Analysis: please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes

(Morning Workout) Complete Racing Solutions MX Speed Workout #1

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: to maximize your productivity, during Set #2 pay close attention to your heart rate levels. The intervals shouldn't begin until you're within your 90-95% heart rate zones. During Set's #3 and #4, you should feel that you could drop the hammer at any time, if your heart rate is too high, you will not be able to complete the 20 minute pacing blocks feeling like you are in control.

Post Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

(Afternoon Workout) Complete Racing Solutions Combo Weight Workout – Muscular Endurance

[Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are familiar with a longer duration.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contractions.

Sets: 2

Duration: 40 Seconds (unless otherwise noted)

Post Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **Evening Wellness Protocols:** watch this video in a place where you have zero distractions for 5 minutes (the length of the video)
Psychology: concept video "**Difference between Anabolic or Catabolic**" – [video link](#)

Wednesday

- **Body Analysis:** please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- **(Complete One of the Following-Morning Workout) Complete Racing Solutions Row: Explosive Power Intervals (40-50 Min)**

Workout notes: this workout is going to create a high level of lactic acid and challenge you both mentally so come to this workout well hydrated, fed and rested (ideally complete this workout in the morning before beginning your day if logistically possible).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contractions.

Warm Up: HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.
Load Level: 3 Duration: 2000 Meters **Pull Rate:** less than 25 **Stretch from head to toe**

REPEAT THE FOLLOWING FOR 30 Minutes
Load Levels: 5

100 Meters: 100% Sprint from a near dead stop

With good form and deep breathing – sprint for **100 Meters**

400 Meter Active Recovery (HR Zone 2 or less); with optimized pull mechanics, reduce your pull rate; at the end of 400 meters, move right back into your 100-meter sprint. **Stretch & hydrate as needed for optimum results**

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.
Load Level: 3 Duration: 2000 Meters **Pull Rate:** less than 25 **Stretch from head to toe**

- **Complete Racing Solutions Bike: Explosive Power Intervals (45 Minutes)**
Workout notes: this workout is going to create a high level of lactic acid and challenge you both mentally so come to this workout well hydrated, fed and rested (ideally complete this workout in the morning before beginning your day if logistically possible).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contractions.

Warm up (HR Zone 1):

Duration: 10 minutes

Cadence: 80-85 (no higher/lower)

Gearing: small chain ring up front, middle rear gearing

Misc.: stretch and hydrate before moving into your main set

REPEAT THE FOLLOWING FOR 30 Minutes

30 Seconds: 100% Sprint from a near dead stop

90 Seconds: (HR Zone 2 or less):

Cadence: 60-75 focusing on optimized pedal mechanics **Gearing:** the easier the better

Misc. Notes: Hydrate to maintain your blood sugar levels every 10 minutes.

Cool Down (HR Zone 1): Keep a close eye on your HR level for the final 5 minutes

Duration: 5 minutes

Cadence: 85-90

Gearing: the easiest combination that gets you into HR Z1

Misc.: don't dismount until your heart rate is within HR Z1

- **(Immediately following your Power Intervals) Complete Racing Solutions Core Work**

Workout notes: complete each of the following exercises for 30 seconds; your rest interval is 30 seconds as you move to the next exercise. Go through each exercise and then repeat the entire set - total of 2 sets.

Open Abdominals: [click here for video](#)

Hanging Leg Lifts: [click here for video](#)

Push Ups & Knee to Chest: [click here for video](#)

Pike-Side to Side Steps: [click here for the video link](#)

Post Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window & replace depleted muscle sugar (making tomorrows workouts more productive).

- **Evening Wellness Protocols:** watch this video in a place where you have zero distractions for 5 minutes (the length of the video)
Psychology: concept video "[Difference between Anabolic or Catabolic](#)" – [video link](#)

Thursday

- **Body Analysis:** please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX Aerobic Workout #1**

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: 2 x 30 minute aerobic blocks are going to teach your body to burn stored body fat as a primary fuel source. If you allow your HR to get too high, you will "teach" your body to burn stored sugar and NOT fat. To say that your HR monitor is the key component to nailing the focus of this workout would be an understatement. Maintain your blood sugar levels throughout the workout to maximize your productivity (implantation of your skills and drills along with improve your brain's ability to handle race

Post Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout – Muscular Endurance**

[Please use the spreadsheet and associated videos listed at the bottom of this document]

Workout Notes: these exercises are familiar with a longer duration.

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contractions.

Sets: 2

Duration: 40 Seconds (unless otherwise noted)

Post Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).

- **Evening Wellness Protocols:** watch this video in a place where you have zero distractions for 5 minutes (the length of the video)

Psychology: concept video "Difference between Anabolic or Catabolic" – [video link](#)

Friday

- **Body Analysis – please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**
- **Complete one of the following before breakfast:**

- **(Morning Workout) Complete Racing Solutions Bike: Even Tempo/ Aerobic Enhancement (60 Minutes)**

Workout Notes: the key to this workout is making sure that you stay within HR Z2 (no higher); this will teach your body to spare sugar and burn stored body fat for energy (making you leaner and improving your VO2 Max).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contractions.

Warm Up: HR Zone 1

Duration: 10 minutes

Cadence: 80-85 (no higher/lower)

Gearing: small chain ring up front, middle rear gearing

Misc.: stretch and hydrate before moving into your main set

Main Performance Block: 45 minutes (HR Zone 2)

Set Notes: with your cadence between 75-85; tallest gearing that you can maintain while keeping the chain tension tight and maintaining your cadence zone; every 10 minutes stand up and stretch your hamstrings, quads, calves and lower back.

Warm down: 5 Minutes (HR Zone 1)

Duration: 5 minutes (no shorter)

Cadence: 70-80 (no higher/lower)

Gearing: small chain ring up front, middle rear gearing

Misc. Notes: stretch your lower back, calves and quads prior to dismounting

Post Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar.

Complete Racing Solutions Row: Even Tempo/ Aerobic Enhancement (60 Minutes)

Misc. Notes: the key to this workout is making sure that you stay within HR Z2 (no higher); this will teach your body to spare sugar and burn stored body fat for energy (making you leaner and improving your VO2 Max).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contractions.

Warm up-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Display: Time

Load Level: 3

Duration: 10 Minutes

Pull Rate: less than 25

Stretch from head to toe

Main Set: 45 Minutes within HR Z2 (no higher or lower): Form is more important than pace to avoid injury

Display: Time

Load Level: 5 **Duration:** 45 Minutes

Pull Rate: 25-30

Hydrate: every 10 minutes

Cool Down-HR Zone 1: Focus on a straight back and leading with your legs and finishing with your arms coming to your chest.

Load Level: 3 **Duration:** 5 Minutes

Pull Rate: less than 25

Post Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar.

- **Evening Wellness Protocols:** watch this video in a place where you have zero distractions for 5 minutes (the length of the video)

Psychology: concept video "[Difference between Anabolic or Catabolic](#)" – [video link](#)

Saturday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet** to log this information for evaluation purposes

- **(Morning Workout) Complete Racing Solutions MX: Speed Workout #2**

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: simple protocols – see how fast you can go for 5 and 2 lap intervals. Refrain from becoming sloppy and focus on executing perfect mechanics: good throttle control, avoiding the rear brake, looking through the corners, tight core in corners, etc. Because of the intensity levels, you will drain your stored sugar levels, so hydrate with Energy Fuel after every set. **Post**

Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).

- **2 Hour Power Nap after lunch**

Misc. Notes: prior to your nap, consume a meal that is high in MCT's (medium chain triglycerides) - extra virgin olive oil, avocados, raw coconut, raw nuts and cold-water fish (salmon). This quality fat will be used to recharge your body from the inside out while satisfying your appetite so that you can sleep soundly for 2-3 hours. When you wake up, consume 8-10 ounces of cold water and 2 scoops of Energy Fuel.

- **Evening Wellness Protocols:** watch this video in a place where you have zero distractions for 5 minutes (the length of the video)

Psychology: concept video "[Difference between Anabolic or Catabolic](#)" – [video link](#)

Sunday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet** to log this information for evaluation purposes

- **(Morning Workout) Complete Racing Solutions MX: Aerobic Workout #2**

[Please reference the spreadsheet at the bottom of this document]

Workout Notes: this workout is going to assess your aerobic capacity on the track. Pay close attention to your heart rate levels throughout each 30-minute moto; if your heart rate goes beyond your 85% heart rate number, you need to slow down and smooth out on the track. Keep in mind that if you go beyond 85%, we will not have an accurate evaluation of your aerobic function on the bike. Taking the smooth lines includes smooth throttle, clutch and brake control everywhere on the track. Focus on landing on the backsides of all the jumps to keep your momentum as high as possible, with the least amount of energy.

Post Workout Protocols

- **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
- **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrow's workouts more productive).

- **2 Hour Nap After Mid-Day Meal**

Misc. Notes: if possible, schedule this nap so that you are laying down within 15 minutes of finishing your post run meal; keep the room as dark and as cool as possible; before laying down consume 6-8 ounces of [Energy Fuel](#) to provide your body a dose of much needed electrolytes (lost through sweat); the replenishment of these electrolytes will improve your results within tomorrow workload.

- **Evening Wellness Protocols:** watch this video in a place where you have zero distractions for 5 minutes (the length of the video)

Complete Racing Solutions MX Speed Workout #1						
Workout Focus: Opening Speed				Total Ride Time: 60 Minutes		
		Description				
Warm Up		Set Focus: Gradual Warm Up			Intensity	
		Instructional Video on how to set up the Concept 2 Rower Ride either a bike or Concept 2 Rower easy for 10 minutes - even tempo Stretch passively (no bouncing) from head to toe / Re-hydrate with Energy Fuel			Less Than 50%	
Main Set #1		Set Focus: Pre-Race Routine			Intensity	
Workout Protocol:		Complete 10 starts with your emphasis being on implementing your complete pre-race routine. On race day, your body will emulate what you practice so stay mentally focused & specific. Rest For 10 Minutes - Stretch from head to toe / Re-hydrate with Energy Fuel			Too Short To Evaluate	
Main Set #2		Set Focus: Opening Lap Speed			Intensity	
Workout Protocol:		This set will emulate what a race should feel like; be mentally prepared to come to the line with the fastest and smoothest lines possible. Mentally rehearse these two laps. Consistency is the key to maximizing your productivity. Moto Specific Heart Rate Zone - Low # High # 5 Minutes (no more or less) - Stretch and hydrate as necessary				
Rest Interval Performance Times: Performance Times: Performance Times: Performance Times: Performance Times: Performance Times: Recap:	Lap 1 Time:	Lap 2 Time:	Lap 3 Time:	Lap 4 Time:	90-95%

Complete Racing Solutions MX Aerobic Workout #2

Workout Notes: this workout is going to assess your aerobic capacity on the track. Pay close attention to your heart rate levels throughout each 30-minute moto; if your heart rate goes beyond your 85% heart rate number, you need to slow down and smooth out on the track. Keep in mind that if you go beyond 85%, we will not have an accurate evaluation of your aerobic function on the bike. Taking the smooth lines includes smooth throttle, clutch and brake control everywhere on the track. Focus on landing on the backsides of all the jumps to keep your momentum as high as possible, with the least amount of energy.
