Monday

- **Body Analysis: please use your Coach Robb Body Analysis Spreadsheet to log this information for evaluation purposes**
- **Complete Rest Day**

Misc. Notes: though we have discussed this a lot in the past, dedicate some extra attention to your sweat rate this week. Keep in mind that a sweat rate above 2% can decrease your power and strength significantly. It doesn't make sense to spend so much time developing your strength only to have it eroded by dehydration. Watch the color of your urine throughout the day – it should be relatively clear. If your urine is slightly discolored and you haven't consumed a B Vitamin, then you need to bump up both your hydration intake (half of your body weight in ounces of water) and your amino acid intake (your body is breaking down muscle tissue hence the discoloration of your urine if you are well hydrated).

- **Complete Racing Solutions MX Speed Workout #1**
[Please refer to the spreadsheet at the bottom of this document]
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Workout Notes: pay extra attention to your heart rate for the first 15 minutes of each block - HR Z2 or less. At the 15-minute mark, bump up the pace slightly (into HR Z3) by driving your entry speed along with a smooth and early throttle on your exits. Remember, the smoother you ride, the lower your heart rate (resulting in more burned fat and the conservation of stored sugar in your liver and muscles).
Post Workout Protocols
 - **Flexibility:** complete an entire stretch routine for your hips, hamstrings, quads and calves – [CLICK HERE](#)
 - **Nutrition:** immediately consume [Best Whey Protein](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- **2 Hour Power Nap after lunch**
Misc. Notes: prior to your nap, consume a meal that is high in MCT's (medium chain triglycerides) - extra virgin olive oil, avocados, raw coconut, raw nuts and cold-water fish (salmon). This quality fat will be used to recharge your body from the inside out while satisfying your appetite so that you can sleep soundly for 2-3 hours. When you wake up, consume 8-10 ounces of cold water and 2 scoops of Energy Fuel.
- **Evening Mental Protocols:** watch this video in a place where you have zero distractions for 5 minutes (the length of the video).

Sunday

- **Body Analysis** – please use your **Coach Robb Body Analysis Spreadsheet** to log this information for evaluation purposes **(Morning Workout) Complete Racing Solutions MX Aerobic Workout #1**
[Please refer to the spreadsheet at the bottom of this document]
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of ice cold [Energy Fuel](#) to help stabilize your blood sugar levels throughout the workout. Remember, cooler fluids absorb quicker than warmer fluids.

Workout Notes: the emphasis for this workout is to lower your overall effort (based exclusively on your heart rate) and learn how to ride smooth, yet efficiently fast. It doesn't take a lot for you to "push the pace"; however, it will take patience and mental focus to find a comfortable speed with a lower overall heart rate. By following the indicated intensity levels, you will learn that you can actually become faster by lowering your effort down thanks to the momentum you will create. Remember, stay focused and Ride Smart Not Hard!

- **(Afternoon Workout) Complete Racing Solutions Bike: Even Tempo/ Aerobic Enhancement (70 Minutes)**
