- **Blue highlights indicate HR Zone 2 or less (Builds your aerobic engine – burns fat as a primary fuel source)**
- **Red highlights indicate HR Zone 3+ (Builds your strength & speed – burns stored sugar as a primary fuel source)**

Monday

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **Complete Rest Day**
Misc. Notes: if logistically possible, sleep in and don't begin your day with an alarm; instead wake up when your body is ready (Note: this may mean that you need to go to bed a little early to fit your personal schedule). Before getting out of bed, lay flat on your back and relax; focus on diaphragmic breathing and maximizing your oxygen uptake. After you become completely relaxed, I want you to get the small of your back (right above your butt) flat on your bed. If you are not able to keep your lower back flat on the bed, take some extra time and foam roll your quads, ITB and glutes. By doing this, you will improve the range of motion within your hips and legs – this will enhance your biomechanics as an athlete.
- **Evening Protocols**
Misc. Notes: when you lay down to go to sleep, your goal is to get to sleep as quickly as possible, sleep as deep as possible and stay there as long as possible. If your brain doesn't have enough sugar to last through the night, you will wake up – not an ideal scenario when it comes to recovering from your day of training. An additional focus of getting to sleep quickly is associated with your body's production of hGH (human growth hormone). Human growth hormone is what makes you leaner and incorporates with other hormones necessary for complete recovery from the workloads associated with your training. With this being said, consume a highly dense snack or smoothie to help satisfy your brains need for sugar (from your liver) and your muscles needs for amino acids.

Tuesday

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Afternoon Workout) Complete Racing Solutions Combo Weight Workout: Muscular Endurance Phase 1**
[Please use the spreadsheet and associated videos listed at the bottom of this document]
Workout notes: come into this workout session mentally prepared to be challenged. Take extra precaution NOT to lose your form as you complete the exercises – this will only increase your chance for injury. Stretching in between exercises will help keep the muscles from cramping up and keep them performing at a maximum output level; with the shorter rep count, you will have the time.).
Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.
Weight: choose a weight that you can complete 10 reps with good form; maintain the same weight for second set
Speed of Lift: quick off the bottom, slow (3 count) back to your starting point
Rep Count:
Upper Body the goal is to complete **8-10 reps max**
Lower Body the goal is to complete **8-10 reps max**
Sets: 2
Post Workout Protocols
 - **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads, and calves
 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- **Evening Protocols:** please reference Monday's notes

Wednesday

- **Body Analysis:** please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions Bike: Even Tempo (90')**

Workout Notes: keep a close eye on your HR throughout this ride to ensure that you are staying aerobic for maximum productivity (loosen tight muscles, get nutrients to torn down muscle tissue, etc.). Adjust your gearing to keep your leg turnover in the 80-90 range (no higher or lower to keep the accumulation of lactic acid to a minimum).

Pre-Hydration & Nutrition: 10-15 minutes prior to this workout, consume 8-10 ounces of cold [Energy Fuel](#) to top off both your calories and provide electrolytes for proper muscle contraction. Note: cold fluids absorb better than warm fluids helping hydration.

Warm Up (HR Z1)
Duration: 10 minutes
Cadence: 80-85 (no higher/lower)

Gearing: small chain ring up front, middle rear gearing
Misc.: stretch and hydrate before moving into your main set

Main Set: 70 Minutes (HR Z2)
Set Notes: with your cadence between 80-90; tallest gearing that you can maintain while keeping the chain tension tight and maintaining your cadence zone; every 10 minutes stand up and stretch your hamstrings, quads, calves and lower back.

Cool Down: 10 Minutes (HR Z1)
Duration: 5 minutes (no shorter)
Cadence: 80-85 (no higher/lower)

Gearing: small chain ring up front, middle rear gearing
Misc.: Notes: stretch your lower back, calves and quads prior to dismounting

Post Workout Protocols

 - **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).- **Evening Protocols:** please reference Monday's notes

Saturday

- **Body Analysis – please use your Coach Robb Report Card to log this information for evaluation purposes**
- **(Morning Workout) Complete Racing Solutions MX: Aerobic Workout #1**

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: This set is going to teach you how much faster you can go when you focus on staying aerobic for 95% of your total ride time. Your last set will feel easy due to fact that you have been aerobic for the majority of your workout. Pay close attention to your heart rate to ensure that you have the energy stored to drop the hammer during set number five.

Post Workout Protocols

 - **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
 - **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
- **2 Hour Nap After Mid-Day Meal**

Misc. Notes: immediately following your lunch of high-quality greens and fruits, lie down in a dark cold room and strive to get two to three hours of sleep. This window of sleep will provide your body with the opportunity to release natural growth hormones to begin the recovery process from this morning's workout. When you wake up, immediately consume a fruit smoothie and a serving of amino acids to provide your body the building blocks necessary to repair your muscles.
- **(Afternoon workout) Complete Racing Solutions Bike: Even Tempo (90')**

Workout Notes: keep a close eye on your HR throughout this ride to ensure that you are staying aerobic for maximum productivity (loosen tight muscles, get nutrients to torn down muscle tissue, etc.). Sunday

- **Body Analysis** – please use your Coach Robb Report Card to log this information for evaluation purposes
- **(Morning Workout) Complete Racing Solutions MX: Speed Workout #1**

[Please refer to the spreadsheet at the bottom of this document]

Workout Notes: this day needs to be approached as if it was a national - food, warm up, etc. The mental side of this workout is for you to familiarize your body with what you expect from it on race day: perfect execution of all the homework you have put into your racing. With your focus being on producing the fastest laps possible, your sight lap needs to be focused and productive. Have fluids and calories (exactly what you want to consume on race day) available to maintain your blood sugar levels (to maintain mental clarity and energy) throughout the entire workout.

Post Workout Protocols

- **Flexibility:** complete an [entire stretch routine](#) for your hips, hamstrings, quads and calves
- **Nutrition:** immediately consume [Recovery Fuel](#) to shorten your recovery window and replace depleted muscle sugar (making tomorrows workouts more productive).
